DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4 to 7 and 14, drawn to a flaky isotropic flaky SmFeN magnetic material having a thickness of 10 to 40 microns and a bonded magnet made from the claimed SmFeN material, classified in class 148, subclass 301.
 - II. Claims 9 to 13 and 15 to 18*, drawn to a method of making a flaky isotropic flaky SmFeN magnetic material by melt spinning a melt of the alloy, annealing the alloy powder and nitriding the annealed alloy powder, classified in class 148, subclass 122.

The inventions are distinct, each from the other because of the following reasons:

*NOTE In the Preliminary Amendment submitted January 20, 2004; have added 4 new claims, which were misnumbered as 15, 16, 17 and 19. The last listed new claim was misnumbered as 19, rather than 18. In view of this, the Examiner has renumbered the last listed new claim as 18. Thus, the newly added claims have been numbered as 15, 16, 17 and 18.

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process

Art Unit: 1742

(MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as for example, a process wherein the alloy melt is directly melt spun to the desired crystal structure and nitrided without an annealing step or wherein the alloy is melt spun and the alloy is then annealed in a nitriding atmosphere.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. R. Eugene Varndell, Jr. on June 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
